

Growth Is Strong But Profitability Is Splitting Between Segments

Revenue grew 95% since FY2019, while Cloud and Productivity are pulling away from Personal Computing on margin.

The Margin Gap is Widening: Cloud and Productivity Improve While Personal Computing Stalls

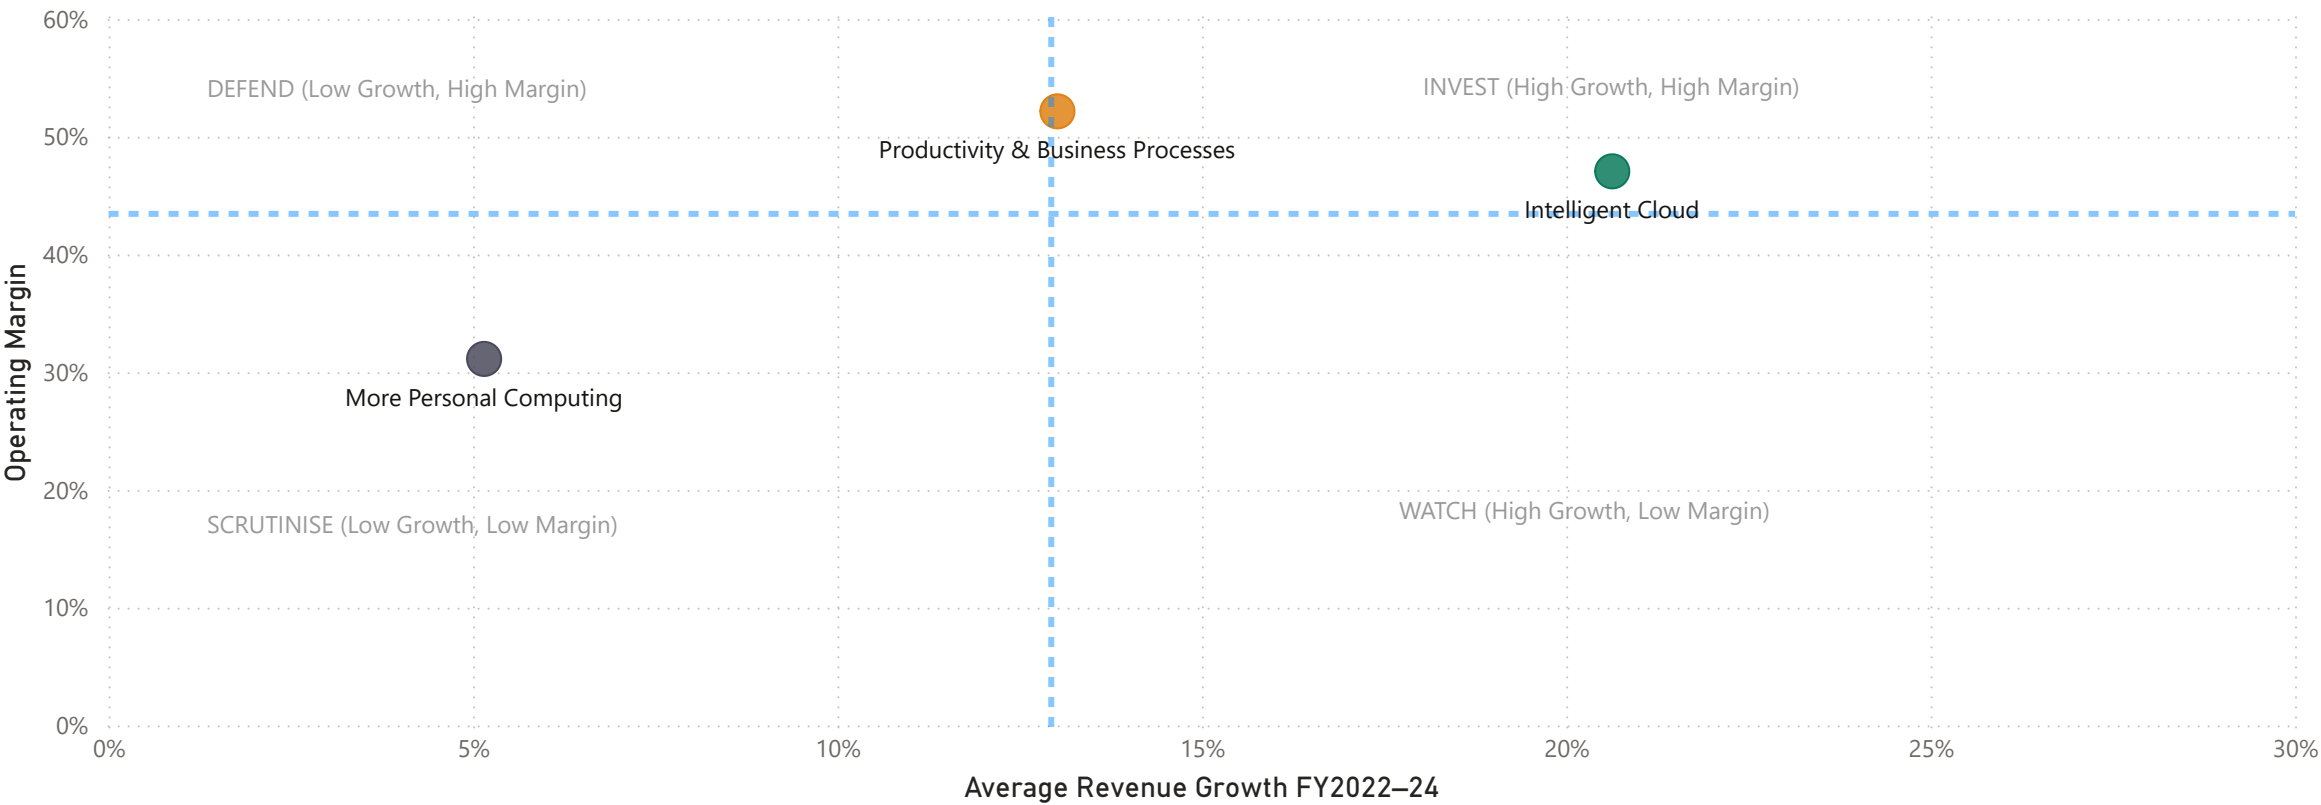

Cloud Overtakes as the Largest Segment

Cloud Grows Fastest, Productivity Earns Most, Personal Computing Lags on Both

Each dot shows FY2024 margin against average growth over the prior three years. Productivity sits on the average growth line, margin separates it not growth.

INVEST in Intelligent Cloud
Concentrate investment here.

DEFEND Productivity & Business Processes
Protect and optimise, while not overfunding.

SCRUTINISE More Personal Computing
Requires a hard look before further spending.
